# 1. EurEthICS ETSIA ® - Certification

EurEthICS ETSIA ® is an institute located in Belgium and registered at the European Union Office for Intellectual Property (Certificate of Registration n° 016602526), providing Certifications of educational services (Quality Control). The Certification and Quality Control is based on the synergic work of the two institute's offices: EurEthICS Training Academy for the standards definition and validation and ETSIA for verification and registration of the athletes, students, managers and teachers, academies, training centres, schools. Since the 22 March 2018, EurEthICS ETSIA is Official Partner of the European Commission, European Week of Sport thanks to the credits acquired since the first edition in 2015. EurEthICS ETSIA is also Partner of the European Sport Forum as well as Strategic Partner of the European Platform for Sport Innovation EPSI - House of Sport in Brussels.

EurEthICS ETSIA regulations and principles are based on art. 165 TFEU – EU sport legal basis - and on European Union's *acquis* (general legislation and recommendations combined with best practices developed inside the framework of European Programmes such as Erasmus Plus and LIFE), but also on the European Qualifications Framework EQF for Life Long Learning, ECVET, ESCO tools, Europass etc.. EurEthICS validation methodology is in compliance with the European Qualifications Framework (EQF) and with the standard n° ISO/IEC 17024:2012 on "Evaluation of Conformity - Requirements for the Operation of Various Types of Bodies Performing Inspection" (Licence n° ISO 17024:2012 to EurEthICS Training Academy n°: OP-22926 on 19/08/2014). EurEthICS ETSIA is signatory party and promoter of the Pact for Skills, launched by the European Commission in 2020. EurEthICS ETSIA is signatory party of the Healthy Life Style for All Pledge, an initiative of the European Commission, and certifying body of the project Erasmus eYOU Aca, with CSIT, International Workers and Amateurs in Sport.

EurEthICS ETSIA certification and registration methods have been presented during the first edition of the European Week of Sport in September 2015 (EurEthICSport for All registered event 2015: with presence and demonstration at the European Week of Sport Village), with methods development during the edition 2016, 2017 when it has been recognised, during the official visit at the European Parliament, as "high level certification standards" (see Annex A European Parliament News Edition 547 – 4 October 2017). Since 2016, EurEthICS ETSIA methods became study-subject within the Master in Sport Law, at Paris 1 Panthéon Sorbonne University, courses held by Prof. Giovanni GORDIANI. EurEthICS ETSIA certification is aimed to obtain an international qualification (academic qualification or competence-based qualification).

**EurEthICS ETSIA ® certification methods were created within the Education through Sport sector as pilot project and test-bed to serve all educational and cultural studies. The quality general reference, certified by EurEthICS ETSIA is designed to facilitate and enhance the cooperation activities in the context of European policies and financing programmes (e.g. Erasmus Plus, LIFE and others).**

## 1.a EurEthICS' reference: EQF (European Qualifications Framework)

The European Qualifications Framework (EQF), since 2008, is a translation tool that helps to understand and compare qualifications awarded in different countries and by different education and training systems. EQF is a frame of reference used by EU Member States, on voluntary basis, to refine and harmonize their education and training systems. The core EQF is formed by an eight-level scheme that describe knowledge/skills/responsibility-autonomy/competences acquired by the learners (learning outcomes: formal, non-formal, informal learning), with the aim of granting the highest possible objectivity in the evaluation of the reached level of learning process by ranking its achievements.

Thanks to the Council of the European Union's Recommendations of May 2017, the EQF has been confirmed as common reference framework of eight levels, working as translation device between different national qualification systems and levels.

The EQF aims are to:

- Rank the current level of National Qualification Framework/systems (NQF);
- Improve the link between education demand and supply, encouraging the *Training Needs Assessment* (TNA), identifying specific competences;
- Ease the recognition of non-formal/informal system of prior learning (procedure of *Validation Acquis d'Expérience et/ou Apprentissage*–VAdE, VAdA and Recognition, Accreditation, Validation of Prior Learning – RAV PL according to the UNESCO Guidelines);
- Make possible the degrees' translations/transfer/approval in different Countries and systems.

With these goals, the EQF system can be applied for every educational and cultural study sector. In this way, specialised national degrees and professional competences may be compared to the corresponding EQF level and transferred to other national qualifications systems (national sport organisation or national education system - schools and universities). Annex I (d) of the EQF Recommendations define the relation with the right level of the qualification at national level to define the yearly licencing, the liability insurance as well as the tax liability.

## 2. EurEthICS Training Academy (European Education through Inter Cultural Sport & Studies Training Academy) - Validation

EurEthICS is an Academy specialised in Training Needs Assessment (TNA), assessment of - and focus on - the informal and non-formal learning processes (VAdA, VAdE, UNESCO RAV PL) and competences validation. EurEthICS defines and validates training courses and high-level standards developed by internal and external academies and schools on an equal basis for students, amateurs and professionals in the fields of education through sport, health, culture and environment using academic best practices and professional feed-back provided by ETSIA.

**EurEthICS' mission consists in setting high quality training standards**, by estimating training needs (TNA). The analysis is based on the learning outcomes (complying with EQF level descriptors) and schemes of assessment built on impartial criteria of knowledge, skills and competence evaluation (procedure VAdE, VAdA). The validation is made in compliance with EQF EU Council recommendations 2017, on the acknowledgement of formal, non-formal and informal learning process, with the aim to grant objectiveness and lower the risk of conflicts of interest. The ranking and level's awarding is based on Curriculum Vitae and Peer Review and, when needed, through test and validation of learning outcomes. EurEthICS acknowledges and validates competences, following the ETSIA and/or EU Experts' verification, granting an international qualification title in conformity with the definition and EQF descriptors, indicating the related learning outcomes.

EurEthICS Training Academy consists of four Educational Areas:

- A) Education, social, culture, environment, nature: studies and applied practices, e.g, education through cultural studies, amateur grassroots sport, sustainable tourism,
- B) Health and skills development e.g. Wellness, Fitness, Performance related activities, Health enhancing physical activities (HEPA),
- C) Governance, policy, legislation, regulatory framework,
- D) Management, communication and administration (European Union financial instruments).

## 3. ETSIA (Education Through Sport Instructors Association - Education Training Skills Institutional Advisors) - Verification

ETSIA is an association and register of sport managers, sport sector and wellness operators, academy teachers and professors, coaches, instructors, advisors, managers, students and athletes validated by EurEthICS Training Academy able to implement training projects for the Life Long Learning of its certified and registered members on every field of study and practice concerning "education through sport and/or studies", in compliance with the European regulatory framework. ETSIA Members are certified according to registered high-level standards methods adopted by EurEthICS Training Academy, using impartial evaluation of AWH (average workload hours), of ALH (average formal or non-formal learning hours) and of ATH (Average teaching or managing hours). With the obtained validation, ETSIA members committed to maintain and promote high standard of teaching and preparation, as well as to carry on verification and level assessment in compliance with the EQF principles and descriptors. ETSIA associates are committed to participate in all events and competitions respecting the principles of fair play, ethics, interculturality and sustainability of the related goods and services. Furthermore, ETSIA cooperates with EU Experts in the organisation of international and national events for the promotion of sport directly and indirectly related trainings. ETSIA implementation experience provides feed-back to EurEthICS Training Academy for the continuous improvement of the training and certification standards.

## 4. EU Experts (European Union Experts Academy)

EU Experts aisbl ( <http://www.euexperts.eu/> ) is an official network and register of professional in all fields of European Studies, professionals who have gained working and academic experience within European Institutions. EU Expert international qualification title is granted only from Level 5 to 8 EQF to the specialised professionals and experts certified EurEthICS ETSIA ® with special professional and academic merits and for the diffusion of EurEthICS' standards, principles and values.

EU Experts Training Academy ([www.euexperts.academy](http://www.euexperts.academy) recognised by EU Experts aisbl) provides advisory and educational services in every specific sector of European legislation, policies and programmes. EU Experts offers also advice for every stage of EU funded project creation, grant proposal writing and implementation, in all phases of the project cycle management assuring the highest standards of management quality.

## 5. EurEthICS ETSIA ® - Interaction with University and Professional Curricula

EurEthICS Training Academy currently cooperates with the Master's Law of Sports Panthéon Sorbonne University of Paris in its training activities and certification methods, related to international qualifications. EurEthICS ETSIA has harmonised its standards and system of professional and academic/university training credits, enhancing the existing methods and best practice nationally and internationally through its academic departments and centres of expertise.

This method is also applied for the allocation of educational credits for high school students and for the recognition of professional training credits.

### HARMONISATION FOR THE PURPOSE OF MUTUAL RECOGNITION OF QUALIFICATIONS

EurEthICS Training Academy establishes in agreement with the associated University or with the professional organisation an *ad hoc* unit for the harmonisation and possible homologation of international qualifications of professional competence awarded by EurEthICS ETSIA with academic-university qualifications in compliance with the EQF reference framework, in conformity with respective teaching and training plans and the quality protocol agreed between EurEthICS Training Academy and the University or the professional organisation. In particular, the definition of the quality protocol will facilitate

on one side

1. the access of students, undergraduates and graduates of the associated University, to the EurEthICS ETSIA certification of international qualification (as defined by the 2017 EQF Recommendations Annex 1 letter d) with the definition of specific professional practice or study competence in order to enhance the skills, facilitating the access to the labour market and into European programmes such as Erasmus plus and others,

on the other side

2. the access of candidates and qualified students with EurEthICS ETSIA certification to advanced training courses (including Masters) and academic qualifications of the associated university, enhancing their professional training credits (ECVET) into university training credits (ECTS) for the achievement of level 5, 6, 7, 8 EQF academic training courses.

The definition of the entry level will be carried out by ad hoc joint commissions identified by EurEthICS Training Academy and the affiliated University or the selected professional association, through methods of peer review, training needs assessment / analysis, verification of AWH, ALH, ATH and validations (VAdE, VadA Validation Acquis d'Expérience et d'Apprentissage, recognition of prior learning), RAV PL according to UNESCO guidelines).

This validation will promote curricular progression with professional and academic training credits (reference levels 5-8 EQF) for operators, teachers / technical staff, managers, interested in updating their qualifications on the basis of recognised international quality standards and best practices, according to the Lifelong Learning process.

## 6. Objectives and European Sport Decalogue shared by EurEthICS

### Sport framework at European Union level

The Treaty on the Functioning of the European Union (2007) is one of two primary Treaties of the European Union, alongside the Treaty on European Union (TEU). Originating as the Treaty of Rome, the TFEU forms the detailed basis of European Union law, by setting out the scope of the EU's authority to legislate and the principles of law in those areas where EU law operates.

### **Art. 165 of TFEU regulates the social and educational function of sport.**

“developing the European dimension in sport, by promoting fairness and openness in sporting competitions and cooperation between bodies responsible for sports, and by protecting the physical and moral integrity of sportsmen and sportswomen, especially the youngest sportsmen and sportswomen.”

### General objectives:

- To ensure the implementation of the principles of free movement of the operators, trainers and sport teachers within the European Union and Candidate Countries, guaranteeing the high quality of the teaching/training/learning process according to the EU policy, provisions and legislation as well as the European Qualifications Framework, for Life Long Learning;
- To support the establishment of a qualitative general environmental, ethical and cultural framework in accordance with EU law of Reference for European sports federations, academies and associations;
- To promote the volunteer activities in the sport sector enhancing the social inclusion, equal opportunities in order to raise awareness on the importance of physical activity for health maintenance and improvement, encouraging participation and equal access to sport activities..

### Specific objectives:

1. High quality education, training and qualifications methods in sport and studies
2. Harmony between education/training and professional/sports training (“Dual career”)
3. Improvement of health and wellness through sport
4. Fight against doping
5. Role of sport in society
6. Prevention of and fight against violence and intolerance in sport
7. Social and cultural inclusion in (and through) the sport
8. Cultural and Environmental dimension of sport
9. Participatory approach in sport governance
10. Development of the European dimension in sport, through European programme participation
